# Explore what's new in Empower 3.8.0

Empower Software offers new features to **enhance compliance and quality, simplify work** for analysts and administrators, and **increase productivity and efficiency**, while providing **new technology stack support for IT**.

**Reduce risk and variability in your chromatographic workflow, while simplifying work for your administrators with Empower Software.**

## Elevate your quality

Comply with USP Chapter <621> and Ph. Eur. 11th Edition formula and terminology requirements

New assignable privileges and policy updates

Record review of result Audit Trails

Quickly identify permission levels for users

Streamline and optimize your method validation workflow

## Elevate your lab

alliance™ iS | made for Empower®

**Empower Software is your trusted data system for chromatography.**

Unique features that work specifically with the Alliance™ iS HPLC System and Waters eConnect™ HPLC Columns solve common challenges you face every day:

**Prevent Errors with Method Matching:** Empower Software intelligently determines which methods are applicable to your LC system.

**Increase Traceability with Column Tracking and History:** Empower Software is your single electronic source of column-use data.

**Prevent and Respond to Failures with Pre-run Checks:** Empower Software and the Alliance iS HPLC System work together to identify and alert you of common pre-analysis errors.

**Increase Traceability with Empower System Audit Trail:** Log installation of and modifications to your Alliance iS HPLC System hardware and software.

**Maximize Lab Productivity Anytime, Anywhere:** waters_connect™ System Monitoring provides real-time information about your lab's Empower Software-controlled systems.

**Simplify work for analysts and increase efficiency with Empower 3.8.0**
