

Aren't You Tired of Having a Large Backlog of Cases? Break The Backlog!

Trade in Your GC/MS System Today. Streamline Laboratory Operations with LC-MS/MS

When your lab is faced with lots of samples and impending deadlines, you can't afford an unreliable mass spec system that could put your lab or your reputation at risk. Some mass spec solutions can crack when faced with pressure:

- Data quality erodes during long runs
- Data processing is time consuming and becomes a bottleneck
- Getting immediate answers to solve problems as they arise is impossible

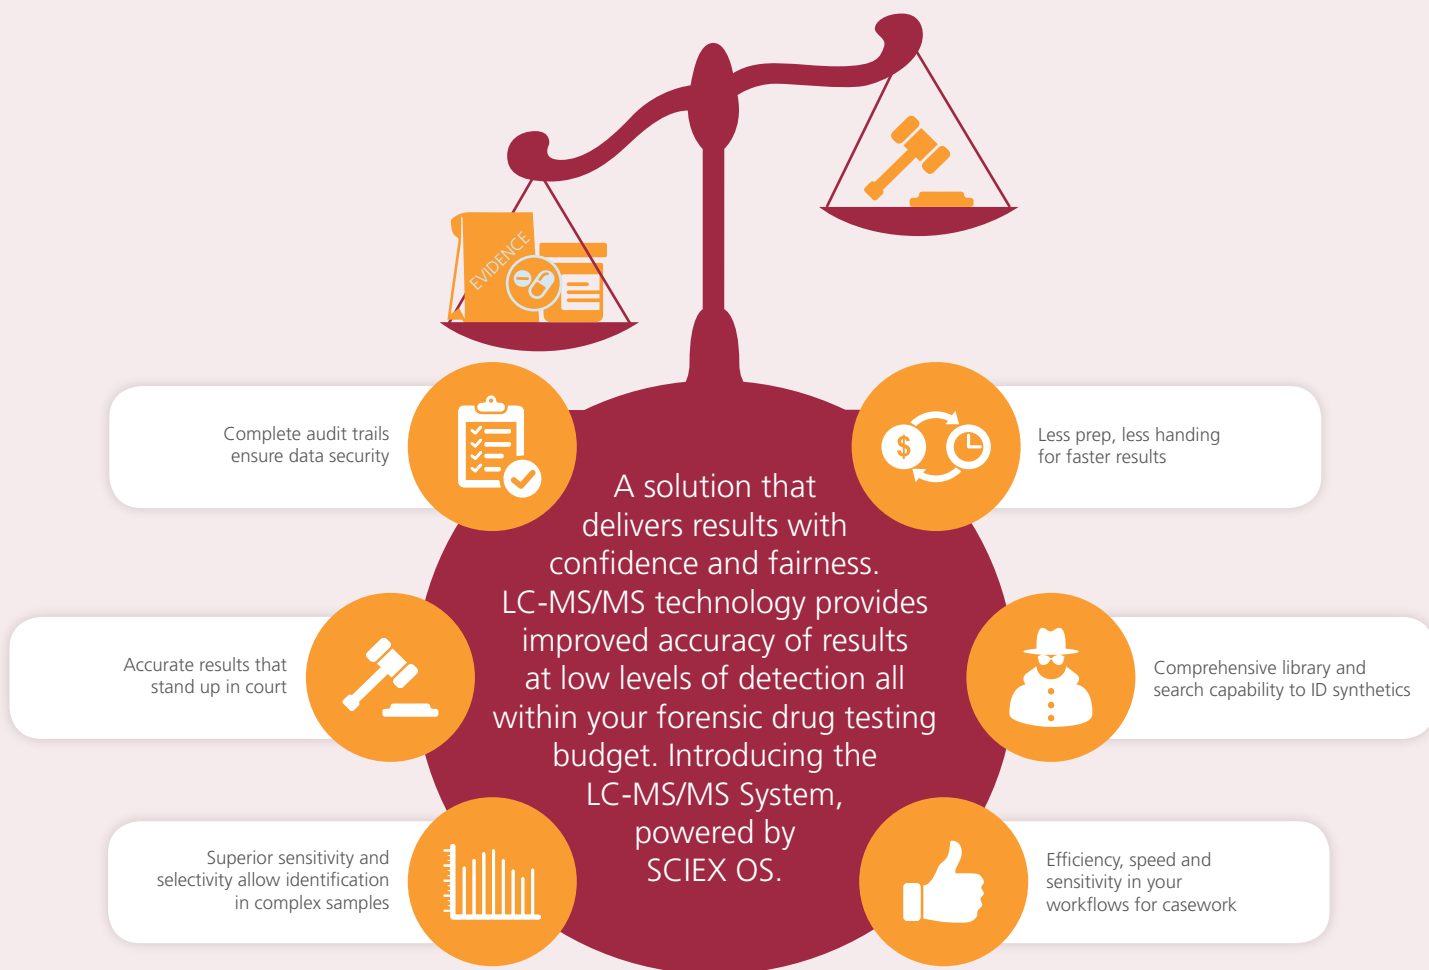

Challenges like these can be detrimental to your lab's productivity. SCIEX Triple Quad™ 3500 mass spectrometer system enables the analysis of more compounds in every injection, lower quantitation limits, and increased sample volume and throughput productivity over conventional GC/MS.

Moving to LC/MS-MS will enable you to analyze Acidic, Neutral and Basic Drugs in one shot

Robust quantitation and performance guaranteed

LC/MS-MS will enable your laboratory technician to deliver you case results quicker by making their routine work more efficient

All within your technology budget
