

Concentration analysis of Mikán juice - Using Handy TD Portable Thermal Desorber and MonoTrap Simplified Enrichment Tools

Handy TD and MonoTrap RGC18TD were used to screen the flavor components of Mikán juice. Handy TD is a compact, portable and easy-to-operate thermal desorption device. After sample collection, place the MonoTrap in the glass liner in the Handy TD, and introduce the heat-desorbed components into the GC inlet. A large number of terpenes, including Limonene, were found in citrus fruit.

Preliminary processing procedure

* Standard samples are not used for qualitative analysis.
Results from a library search.

Product used

Portable thermal desorber HandyTD TD265

Product name: HandyTD TD 265
Cat.No. :2709-80000

Collection MonoTrap RGC18TD

Product name :MonoTrap RGC 18 TD
Cat.No. :1050-74201

MonoTrap RGC18TD

MonoTrap Trial Kit for TD
