

See what you've been missing

Get the most out of your separations with a Thermo Scientific Vanquish UHPLC system with Charged Aerosol Detection

Combine the unique capabilities of the Thermo Scientific™ Charged Aerosol Detector (CAD) with the powerful separation of a Thermo Scientific™ Vanquish™ UHPLC system and save on this highly productive configuration

- Quantify more analytes in your sample with universal Charged Aerosol Detection even without standards
- Obtain uniform response for nonvolatiles, independent of chemical structure, with excellent sensitivity and wide dynamic range using CAD
- Award winning UHPLC systems with state-of-the-art technology gives you better, reliable and robust chromatography with ease
- Systems designed for any application with maximum customization and flexibility for maximum return on your investment
- Simple control and data analysis with intelligent Thermo Scientific™ Chromeleon™ Chromatography Data System Software
- Equipped with easy to use Thermo Scientific™ Viper™ fittings for better separations

Ask your local sales representative how you can get better quantification and save when you purchase a CAD detector with a Vanquish UHPLC system!
